Evaluation Methods Used ↗

The trusted tester process and ANDI were used to create this report. Covered in this testing is all pages in the client facing application: Login Page, MySpace, About Us, Orbit Blog, News, Settings, Search Results, USSF Documentation, Sites & Applications, and the Landing Pages. Also included are the page loading state, and 400 and 500 error pages. This testing does not include pages that are outside of the scope of our team, such as the CAC authentication process, which is handled by an external service. It also does not cover the content management system (CMS) which is covered in a separate report.

Applicable Standards/Guidelines ↗
